MALARKEY SHINGLES

Performance. Sustainability. Peace of Mind.
Malarkey shingles are built to perform better, last longer, and help protect the environment—all without compromising on style or affordability.

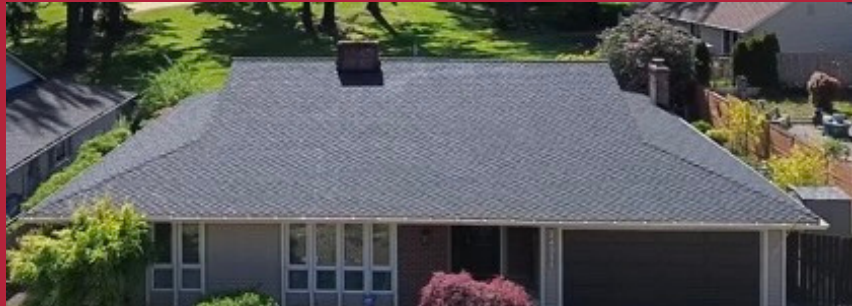

Why you choose us?

MADE BETTER TO LAST LONGER

Unlike standard shingles that can crack, lose granules, or blow off in storms, Malarkey shingles are engineered with:

- Rubberized Asphalt – Provides superior flexibility and tear strength, especially in extreme weather.
- Up to 50% More Laminate Bonds – Helps prevent layers from separating (delamination), improving long-term durability.
- Double the Rain Seals – Extra protection against wind-blown rain and leaks.

WIDER NAILING AREA – Up to 2x larger for faster, more accurate installation and better hold in high winds.

Tested. Trusted. Tough.

Malarkey shingles outperform industry standards in key areas:

- Tear Strength: Up to 35% stronger than the industry standard.
- Granule Adhesion: Up to 65% better retention of protective granules.
- Impact Resistance: Rated Class 4, the highest available, for hail and storm protection.

Built with the Planet in Mind

Malarkey is leading the way in sustainable roofing by turning everyday waste into high-performance shingles:

- Upcycled Rubber
 - Diverts approx. 8 million tires from landfills
- ~5 tires recycled per roof
- Upcycled Plastic
 - Diverts approx. 5.3 billion plastic bags from landfills
- ~3,200 bags recycled per roof
- Smog-Reducing Granules
 - Helps clean the air like planting trees
 - 1.8 million trees' worth of smog-reducing impact
- ~2 trees' worth of clean-air benefit per roof

A Family Business with a Purpose

Malarkey started in the U.S. in 1956 with one simple principle:

- Make shingles we'd want on our own homes.
- Today, with over 69 years of innovation, we continue to lead in performance, quality, and environmental responsibility.

Featured Product: Highlander AR Shingles

Affordable. Durable. Sustainable.

- Made with NEX Rubberized Asphalt
- Class 3 Impact Rated for hail resistance
- Algae-resistant granules to reduce streaking
- Smog-reducing technology to help clean the air
- The first and only entry-level shingle made with advanced polymer-modified asphalt

Thank You for Considering Malarkey

We're proud to make shingles that protect your home and help preserve the planet. If you're a contractor, specifier, or homebuilder, join us in standing for something better:

Performance and sustainability homeowners can trust.
